INTRO

Hello, my name is Jesse and I recently graduated with an M.S. in CyberSecurity from Grand Canyon University. I have completed many personal and educational projects that can be found on my GitHub above. These projects include creating my own environment with known and unknown vulnerabilities and completing the necessary steps to re-secure the environment. I've also made my own Business Continuity Plan from my own made-up social media application (FoodMood).

Professional Experience

- 6+ years of service-oriented experience in results and metrics-driven environment
- Strong troubleshooting skills across multiple operating systems
- Experience with reviewing raw log files, data correlation, and analysis (i.e. firewall, network flow, IDS, system logs)
- Experience with Windows, Linux, and Mac OS X networks, Adobe Suite
- Knowledge of security-related frameworks, Technical Writing, CIA Triad processes, and tools (Firewalls, IDS, SIEM, Splunk, Vulnerability scanners, Anti-Virus, Data Leak Prevention, two-factor authentication, and VPN)
- Well-rehearsed with Risk and security framework NIST, ISO, and OSWAP methodologies
- Cyber Security, Vulnerability Assessment, IT Infrastructure, Disaster Recovery, Data Integrity
- Exceptional attention to detail and excellent analytical, organizational, and problem-solving skills
